

**Exhibit 1.01**

**SLEEP NUMBER CORPORATION  
CONFLICT MINERALS REPORT  
FOR THE REPORTING PERIOD  
ENDING DECEMBER 31, 2018**

This is the Conflict Minerals Report (“Report”) for Sleep Number Corporation (“Sleep Number” or the “Company,” “we,” “us,” or “our”) for the reporting period from January 1 through December 31, 2018, and is presented in accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the “Rule”).

The Democratic Republic of the Congo (“DRC”) and adjacent countries have reserves of the minerals tin, tantalum, tungsten, and gold (collectively known as “3TG”). 3TG minerals are commonly used in manufacturing many consumer products. 3TG minerals are occasionally sourced and traded illegally in the eastern DRC and surrounding areas (collectively, “Covered Countries”) by armed groups also responsible for committing human rights violations. 3TG minerals so sourced and traded are known as “conflict minerals.”

The Securities and Exchange Commission (“SEC”) adopted the Rule to implement conflict minerals reporting and disclosure requirements set forth in Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Dodd-Frank”). Section 1502 requires SEC registrants to disclose whether their manufactured products contain conflict minerals that are necessary to the functionality or production of their products. The minerals subject to the SEC’s disclosure requirements are cassiterite (tin), columbite-tantalite (tantalum), gold, wolframite (tungsten), and their derivatives, which, in the case of cassiterite, columbite-tantalite, gold, and wolframite, are limited to 3TG. Sleep Number files this Conflict Minerals Report pursuant to the Rule and Section 1502 of Dodd-Frank.

## **1. Company Overview**

Sleep Number Corporation, based in Minneapolis, Minnesota, was founded in 1987 and became publicly traded in 1998. We are listed on The Nasdaq Stock Market LLC (Nasdaq Global Select Market) under the symbol “SNBR.”

Our mission is to improve lives by individualizing sleep experiences. Our vision is to become one of the world's most beloved brands by delivering an unparalleled sleep experience. We expect to achieve our goals by executing our consumer innovation strategy with three significant competitive advantages: proprietary sleep innovations, exclusive retail distribution, and lifelong customer relationships.

As a purpose-drive brand and the leader in sleep innovation, Sleep Number delivers proven quality sleep through effortless, adjustable comfort and biometric sleep tracking. We are visionary leaders in sleep and wellness and are redefining what consumers should expect from their bed. Our vertically integrated business model and role as the exclusive designer, manufacturer, marketer, retailer, and servicer of Sleep Number® beds allows us to offer consumers high-quality, individualized sleep solutions and services. As a direct-to-consumer brand, we offer consumers a cohesive experience across our Sleep Number® stores, online at SleepNumber.com or via phone at (800) 753-3768.

In 2018, we revolutionized sleep with our complete line of Sleep Number 360® smart beds. The 360® smart bed, at the forefront of the digital health and wellness revolution, is rapidly becoming the “hub” for

a healthy life by delivering proven quality sleep. It is the only bed in the world that offers SleepIQ® technology, a proprietary sensor technology that tracks each sleeper’s individual data, including movement, breathing rate, heartbeat and sleep habits. The SleepIQ technology platform captures over 8.5 billion biometric data points every night, building one of the most comprehensive databases of biometric sleep data in the world. Today, the 360 smart bed uses this data to automatically adjust the comfort of the bed for proven quality sleep. Through daily digital interactions that build lifelong relationships, SleepIQ technology also communicates how you slept and provides insight into what adjustments you can make, including adjusting your Sleep Number® setting, to optimize your sleep and improve your daily life.

In early 2017, Sleep Number ceased operating and wound down the assets of Comfortaire Corporation, a company Sleep Number acquired in January 2013. During the course of our Reasonable Country of Origin Inquiry (“RCOI”), Sleep Number’s cross-functional Conflict Minerals Task Force (as defined below) learned that Sleep Number fulfilled its limited warranty obligations for previously-sold Comfortaire products in 2018 by supplying replacement finished mattress covers and air chambers from third-party suppliers, including three finished mattress cover suppliers and one air chamber supplier, respectively. We therefore included the suppliers providing the finished covers and air chamber for legacy Comfortaire products in this Report.

## **2. Reasonable Country of Origin Inquiry (“RCOI”)**

In accordance with the requirements of the Rule, Sleep Number’s cross-functional Conflict Minerals Task Force (as defined below) performed a RCOI designed to determine if any 3TG necessary to the functionality and production of our products may have originated in the Covered Countries. We surveyed all active suppliers and asked those who indicated the presence of 3TG in their products to complete the Conflict Minerals Reporting Template (“CMRT”) created by the Responsible Minerals Initiative of the Responsible Business Alliance (formerly the Electronic Industry Citizenship Coalition and Global e-Sustainability Initiative) (“RMI”). We reviewed supplier CMRT responses for accuracy and completeness and contacted suppliers if we needed additional information or clarification about their respective responses. Nineteen direct suppliers indicated the presence of 3TG in products supplied to Sleep Number. Five of the nineteen suppliers reported that the 3TG in the supplied products may have originated in Covered Countries, nine reported that the 3TG in the supplied products did not originate in the Covered Countries, and five suppliers reported that the origin, mines, or facilities used to produce the supplied 3TG are unknown.

## **3. Diligence**

### **3.1 Design of Due Diligence**

As a result of our RCOI, we determined that the 3TG contained in some of our products may have originated in one or more Covered Countries. We therefore engaged in due diligence regarding the sources and chain of custody of this 3TG in accordance with Rule 13p-1 of the Securities Exchange Act. We looked to the Organisation for Economic Co-operation and Development’s (“OECD”) framework and its Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (“OECD Guidance”) throughout this process for guidance.

#### **Step 1 – Company Management Systems**

##### *Conflict Minerals Policy*

Sleep Number has adopted a Conflict Minerals Policy that has been made available to its suppliers and the public at <https://www.sleepnumber.com/legal-notices>. The website and information accessible through it are not incorporated into this Report.

### *Internal Management Structure*

Sleep Number has established an internal management process to support its supply chain due diligence efforts. We established a cross-functional Conflict Minerals Task Force (“Task Force”) of subject matter experts from relevant functional areas of the Company including sourcing, legal, and product compliance to implement our conflict minerals due diligence and compliance strategy. Task Force members brief management in their respective functions monthly during the due diligence process.

### *Supply Chain Controls and Transparency*

Sleep Number expects its suppliers to source 3TG from ethical sub-tier suppliers and to adopt the RMI’s Responsible Minerals Assurance Process (“RMAP”) (formerly the Conflict Free Smelter Program) as a compliance standard. We require suppliers to annually certify whether the products they supply to Sleep Number in that calendar year contain 3TG and, if so, to provide written evidence documenting their due diligence efforts and source determinations. We centrally maintain all relevant documentation in an electronic format.

### *Supplier Engagement*

Sleep Number is committed to ensuring conflict-free sourcing of metals through collaboration with suppliers by incorporating compliance expectations in new commercial contracts and written agreements. Suppliers are referred to Sleep Number’s Conflict Minerals Policy and are educated on an as-needed, ongoing basis about the requirements, methods, and importance of 3TG supply chain due diligence and disclosure.

### *Company Grievance Mechanism*

Sleep Number has a Company-level grievance mechanism in place that may be used for reporting issues regarding Conflict Minerals sourcing.

## **Step 2 – Identify and Assess Risk in the Supply Chain**

Sleep Number does not directly source 3TG from mines, smelters, or refiners, and is in most cases several production levels removed from them. We therefore rely on our direct suppliers to collect data about the presence and country of origin of any 3TG necessary to the functionality of any products supplied to us. We surveyed direct suppliers and evaluated their respective responses to determine the sufficiency, accuracy, and completeness of the information provided. We contacted suppliers with insufficient, potentially inaccurate, or incomplete responses for additional information.

## **Step 3 – Design and Implement a Strategy to Respond to Identified Risks**

Sleep Number’s Task Force provides regular reporting to management in their respective functional areas regarding conflict minerals due diligence and compliance strategy updates. The Task Force provides the necessary information for management to determine on a case-by-case basis whether Sleep Number continues to source from suppliers during mitigation of identified risks in its supply chain.

## **Step 4 – Carry Out an Independent Third-Party Audit of Refiner’s Due Diligence Practices**

Sleep Number does not have direct relationships with 3TG smelters or refiners and, as such, we do not perform direct audits of the entities that provide our supply chain with 3TG. We, however, support and rely on industry efforts to influence smelters and refiners to get audited and certified through the RMI.

## **Step 5 – Report on Supply Chain Due Diligence**

In accordance with the OECD Guidance and the Rule, this Report is available on our website at <https://www.sleepnumber.com/legal-notice>. The website and information accessible through it are not incorporated into this document.

### **3.2 Due Diligence Results**

All of our active, direct suppliers were asked to determine and disclose the presence of 3TG in materials manufactured for Sleep Number in 2018 by completing the CMRT and identifying smelter names and the 3TG's source country.

Nineteen of our direct suppliers in scope for this Report indicated the presence of 3TG in products supplied to Sleep Number. Five of the nineteen suppliers reported that the 3TG in the supplied products may have originated in Covered Countries, nine reported that the 3TG in the supplied products did not originate in the Covered Countries, and five suppliers reported that the origin, mines, or facilities used to produce the supplied 3TG are unknown. We treated one supplier as a non-response because the supplier declared bankruptcy and ceased business operations in 2018 and, as a result, we were unable to obtain information from said supplier.

Despite our ongoing good faith origin inquiries and continued diligence efforts, it is possible, given the complexity and fluidity of our supply chain, the submission of some initially incomplete survey responses by some direct suppliers, and the lack of information regarding certain sub-tier suppliers that the 3TG contained in some of our supplied products may have originated in one or more Covered Country. We intend to continue our inquiry to determine, at a smelter level, if the sources of any 3TG in products supplied to Sleep Number that may originate in a Covered Country are certified as conflict-free. We intend to further develop transparency into our supply chain by using our due diligence processes, driving accountability within the supply chain by implementing the industry standard RMAP, and continuing our supplier outreach efforts.

## **4. Product Descriptions**

Sleep Number manufactures and contracts to manufacture various mattresses, adjustable bases, bedding, and sleep-related accessory products. Each product is made up of numerous components sourced from many suppliers. Some components may contain 3TG. Specifically, 3TG is present in the following products and/or components: adjustable bases, batteries, electric pumps, electric solenoids, foam, heating/cooling engines, heating layers, light bulbs, power cords, printed circuit boards, remote controls, and upholstered headboards. As a result of the due diligence procedures described above, including the required RCOI, we cannot exclude the possibility that some of the 3TGs contained in nine components — batteries, electronic pumps, foam, heating layers, light bulbs, power cords, printed circuit boards in the adjustable base control box, remotes, and upholstered headboards, respectively — may have originated in a Covered Country. Our inquiry and diligence efforts are ongoing.

## **5. List of Smelters/Refiners**

Sleep Number has made a reasonable, good faith effort to collect and assess information concerning 3TG smelters and refiners based on data provided by our suppliers. Please refer to Appendix A for a list of smelters or refiners reported by our suppliers that may supply 3TG utilized in our manufactured products.

## **6. Future Enhancement Measures**

Sleep Number is committed to conducting business activities to the highest standards of ethics and social responsibility and providing our customers with ethically-sourced products. We support the goal of ending violence, human rights violations, and environmental devastation in the DRC and adjoining countries. As a result of our findings for this reporting year, we will continue to enhance our process, including our ability to identify, assess, and quickly mitigate any risk of the presence of 3TG sourced from Covered Countries in our products. We will also continue to require our suppliers to ethically source all materials used in our products. We intend to take the following actions to further refine and improve our 3TG due diligence efforts:

### **Ongoing Efforts:**

- Continue to refine and improve our internal processes and procedures so that we continue to obtain complete responses from our surveyed suppliers.
- Work with our suppliers to ensure accurate, thorough, and timely responses in connection with our RCOI and other due diligence efforts.

### **Enhancement Measures:**

- Investigate additional resources and potential tools to help the Task Force improve tracking, evaluating, and storing of supplier 3TG due diligence data and to help carry out independent third-party audits of 3TG smelters or refiners.
- Identify further external opportunities to enhance our due diligence processes including working with trade associations and other third parties to define and improve best practices.
- Explore and discuss opportunities for best practices enhancements on a regularly scheduled basis.
- For those suppliers who provided information indicating that their products may contain 3TG sources from a Covered Country, we intend to continue our due diligence efforts to either confirm that the 3TG that is sourced from a Covered Country originates with a certified conflict-free smelter or refiner, or require the supplier to find an alternative source of 3TG that does not originate in a Covered Country or that originates with a conflict-free smelter or refiner.

## **Caution Concerning Forward-Looking Statements**

This Report may contain or incorporate by reference certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements contained in or incorporated by reference into this Report that are not statements of historical fact may be deemed to be forward-looking statements, including but not limited to, our ability to constructively work with our suppliers to achieve compliance, our ability to enter into new contracts that incorporate compliance expectations, our ability to maintain long-term relationships with our suppliers, and our ability to improve our due diligence process. We try to identify forward-looking statements in this Report and elsewhere by using words such as “may,” “will,” “should,” “expect,” “plan,” “intend,” “potential,” “continue,” or the negative of these or similar terms. Our forward-looking statements speak only as of the date made and by their nature involve substantial risks and uncertainties.

## APPENDIX A

The following tables reflect the smelters or refiners reported by our suppliers that may supply 3TG used in our manufactured products. Table 1 lists smelters or refiners that appear on the RMI's Active and Conformant Smelters & Refiners Lists as of May 14, 2019. Table 2 lists countries of origin reported by our suppliers for 3TG in their respective supply chains from smelters or refiners which do not appear on the RMI's Active and Conformant Smelters & Refiners Lists as of May 14, 2019.
