FLEXFIT™ ADJUSTABLE BASE ASSEMBLY GUIDE
Congratulations

You’re about to take your sleep experience to a whole new level. Read, watch TV, surf the web and adjust your bed’s firmness for ideal support—all with a single, intuitive remote. We know you’ll fall in love with comfort you can adjust in every way.
FlexFit™ 1
Adjustability, comfortably priced

- Raise the head of your bed to read, watch TV or sleep in ideal comfort
- Adjust your bed’s firmness and elevation at the simple touch of a button

FlexTop® King Sleep Number® c2 mattress shown with complete upholstered bed (sold separately). CAUTION: Please refer to pages 27-29 regarding Important Safety Instructions, Advisories & Product Care.
Your Remote at a Glance

An intuitive remote allows you to choose your ideal firmness—your SLEEP NUMBER® setting—or adjust your FlexFit™ bed position. Switch between them by simply pressing the Menu/Select button.

**My Sleep Number® Setting Button**
Press to return to your Sleep Number setting

**Side Button**
Press to choose your side of the bed

**Menu/Select Button**
Press the Menu/Select button to bring up the menu. From here you can change your Sleep Number setting, adjust your FlexFit™ bed position, rename your side of the bed, find customer support information and more.

**Up/Down Arrows**
Press to adjust your Sleep Number setting or FlexFit™ bed position and scroll up or down in any menu.

CAUTION: Please refer to pages 27-29 regarding Important Safety Instructions, Advisories & Product Care.
FlexFit™ 2

Customize your comfort with countless adjustability

• Enjoy head-to-toe relaxation while reading, watching TV or lounging
• Partner Snore™ technology* lets you gently raise your partner’s head
• Let your body float into the weightlessness of zero gravity
• Adjust your bed’s firmness and elevation at the simple touch of a button

FlexTop® King Sleep Number® c3 mattress shown with complete upholstered bed (sold separately).

CAUTION: Please refer to pages 27-29 regarding Important Safety Instructions, Advisories & Product Care.
*Available with Split King, Split California King and FlexTop® King beds.
Your Remote at a Glance

An intuitive remote allows you to choose your ideal firmness—your SLEEP NUMBER® setting—or adjust your FlexFit™ bed position. Switch between them by simply pressing the Home button.

- **My Sleep Number® Setting Button**: Press to return to your Sleep Number setting.
- **Up/Down Arrows**: Press to adjust your Sleep Number setting or FlexFit™ bed position and scroll up or down in any menu.
- **Side Button**: Press to choose your side of the bed.
- **Head/Foot Bed Position**: Press to select head or foot and use the up/down arrows to adjust.
- **Favorites**: Press to choose popular bed positions including Zero G, Snore and Partner Snore™.*
- **Enter**: Press to select a menu item.
- **Timer**: Press to set a time to return your bed to your favorite sleeping position.

*Available with Split King, Split California King and FlexTop™ King beds.

CAUTION: Please refer to pages 27–29 regarding Important Safety Instructions, Advisories & Product Care.
FlexFit™ 3
Endless adjustability for ultimate relaxation

• Enjoy head-to-toe relaxation while reading, watching TV or lounging
• Partner Snore™ technology* lets you gently raise your partner’s head
• At the touch of a button, turn on a soft light under the bed and control your night stand lamps
• Massage soothes tired muscles and leaves you feeling rejuvenated
• Let your body float into the weightlessness of zero gravity
• Adjust your bed’s firmness and elevation at the simple touch of a button

CAUTION: Please refer to pages 27-29 regarding Important Safety Instructions, Advisories & Product Care.

*Available with Split King, Split California King and FlexTop™ King beds.

Preparing Your FlexFit™ Control System

**1 FlexFit™ Control System Placement**

- Place the FlexFit™ control system on the floor under the head of the bed.
- Plug the power cord into the FlexFit™ control system. Do NOT connect to power at this time.
- **FlexFit™ 3 base only:** Plug night stand lamps (not included) into corresponding Left Night Stand and Right Night Stand outlets on the FlexFit™ control system. See illustration on page 12 for outlet locations.

**2 Connect Your Adjustable Base(s)**

- Plug the junction cable(s) under the adjustable base(s) into the back of the FlexFit™ control system. See illustration on page 12 for connection locations, labeled Sleep Number® Left and Sleep Number® Right.

NOTE: King size beds have a left and right junction cable.
3 Connect Your Under-Bed Lighting (FlexFit™ 3 base only)

- For Twin size beds, you will install one under-bed light; for Full, Queen, and King size beds you’ll install two under-bed lights. See the illustrations to the right for under-bed light placement.

- Peel the adhesive backing off one under-bed light and install the light on the vertical surface inside the rail under the adjustable base, facing toward the center of the bed (see diagram for location). For Full, Queen and King beds, install the second light with the light facing toward the center of the bed (see illustrations for location). 

  NOTE: Ensure that each light faces toward the center of the bed.

- Plug the under-bed light connector(s) into the extension cable(s) attached to the underside of the adjustable base.

- Plug the extension cable connector(s) at the head of the bed into the Nightlight connections on the back of the FlexFit™ control system.

  NOTE: To create a glow when illuminated, lights should face inward toward the center of the bed. Brightness can be adjusted with the remote.
Installing Your Mattress

1 Prepare Your FlexFit™ Adjustable Base

Tools required: utility knife, 7/16-inch socket and ratchet or combination wrench.

WARNING: Exercise extreme caution when using utility knife. The danger of serious finger cuts is possible if utility knife is not used correctly.

IMPORTANT: Wash hands before beginning installation. Residue on hands will easily transfer to cloth-covered bed components.

• Verify FlexFit™ Control System setup steps 1–3 are complete (see pages 14-15).

• Identify four locator pins on the top of the FlexFit™ adjustable base.

NOTE: Locator pins mark the threaded hole locations used for SLEEP NUMBER® mattress attachment.

• Remove all four locator pins and install (4) hex head bolts.

2 Align Mattress Cover

• Unzip the Sleep Number mattress cover and set cover top aside.

• Position the bottom of the Sleep Number mattress cover on top of the adjustable base ensuring the head of the mattress cover (side with openings for air hoses) is matched with the head of the FlexFit™ adjustable base. Make sure the air chambers and foam border walls are not installed, leaving only the fabric mattress cover forming a box (diagram A below).

• Pull the sides of the mattress cover down over the FlexFit™ adjustable base (illustration B below).

• At each hex head bolt location, use the utility knife to make a small cut (no larger than 1/4-inch long) through the mattress cover fabric (illustration C below).

• Pull sides of mattress cover back up to their original position. Remove the mattress cover.

Inverted mattress

Cut slits

Pull out each locator pin from the threaded insert.
Install Mattress Retainer Kit

- Remove hex head bolts.
- Place the four bottom attachment pieces between the FlexFit™ adjustable base and mattress cover bottom at each hex head bolt location.
- Place the mattress cover bottom back on the base. Align the mattress cover with the FlexFit™ adjustable base ensuring that the head of the mattress is matched with the head of the base.
- Place the four top attachment pieces over the four cuts and insert hex head bolts.
- Tighten the four hex head bolts until snug using a 7/16-inch socket.

NOTE: Do not overtighten.
- Complete mattress setup per the SLEEP NUMBER® mattress installation instructions.
Preparing Your Remote(s)

1. Setting Up Your Remote(s)

- Make sure that both the Firmness Control™ system and the FlexFit™ control system are disconnected from power.
- Insert (2) AA batteries (included) into the remote and press any button on the remote.
- A setup screen will appear on the remote. Follow the on-screen instructions to complete setup.

NOTE: The remote on-screen instructions will tell you when to connect the Firmness Control™ system and FlexFit™ control system to a working outlet. For beds without a SLEEP NUMBER® Firmness Control™ system, select Skip on the setup screen.

- If your remote does not automatically go to the setup screen, reset the remote by pressing the Home Button or Menu/Select button, select System, select Settings, select Reset Preferences, select Factory Reset and follow the instructions on the remote.
- When you see a screen that asks, “Is this a replacement or second remote?” select No.
- The next screen will tell you to unplug and re-plug your Firmness Control™ system into a working outlet. Plug the Firmness Control™ system into a surge protector connected to a working grounded wall outlet.

NOTE: DO NOT plug the Firmness Control™ system into the FlexFit™ 3 control system.
- Select Continue on the remote.

- As the air chambers fill you will see a screen that says, “DualAir™ technology engaging,” then, “This may take a few minutes.” Once complete, continue with mattress assembly as directed in the Sleep Number® Bed Assembly Guide, then select Continue on the remote.
- The next screen will instruct you to unplug and re-plug your FlexFit™ control system into a working outlet.

NOTE: The FlexFit™ control system must be unplugged for at least 20 seconds. This is required to allow it to fully power down.
- Plug the FlexFit™ control system into a grounded outlet and select Continue.

NOTE: The Reset button on the FlexFit™ control system will light up when powered. If it does not light up, press the Reset button and check power cord connections.
- You will see a screen on your remote that says, “Remote attempting to sync to foundation,” and then, “Select your type of foundation.” For all non-split beds (Twin, Full, Queen, Eastern/California King) select Eastern/Cal King. Follow the instructions on the screen as the adjustable base engages.
- For FlexFit™ 3 base ONLY, set initial nightlight (under-bed lighting) brightness to Low.
- If you have not already entered your name into your remote, do so at this time.
- Your remote setup is complete.
Preparing Your Remote(s)

2 Adding Replacement Remotes

- Unplug the Firmness Control™ system and FlexFit™ control system from the grounded outlet.
- Repeat step 1 with the new remote.
- When you see a screen that asks, "Is this a replacement or second remote?" Select Yes.
Assembling Your Headboard Brackets (optional)

1 Install Headboard Brackets
NOTE: Headboard brackets are only needed for non-freestanding headboards.
• Use remote to raise the head section of the bed to access the FlexFit™ adjustable base frame.
• Locate the headboard bracket assembly. On one side of the FlexFit™ adjustable base frame, locate two holes for channel headboard bracket mounting.

2 Position Channel Connector
• For Full size beds, use inner mounting holes. For Queen, King or California King beds, use outer mounting holes.
• Position channel connector so the flat side is flush against adjustable base frame. Attach channel connector to adjustable base frame using two 1½-inch hex head bolts/nuts.
3 Attach Headboard Bracket Channel

- Using two 3-inch carriage bolts/nuts, attach one headboard bracket channel to the first channel connector.
- Hand-tighten bolts/nuts (loosely) to allow adjustment of the headboard bracket channels.

4 Attach Headboard Bracket Flange

- Attach one headboard bracket flange to one of the bracket channels with two 1-inch hex head bolts/nuts.
- Repeat on the other side to attach the second headboard bracket flange.
- Slide headboard bracket assemblies (in or out) to achieve a distance of 1½ inches to 2 inches between the edge of the adjustable base and the headboard bracket flange assemblies.
5 Adjust and Secure Brackets

• Firmly tighten the 3-inch carriage bolts on both headboard bracket channels.

• Measure the distance (center-to-center) between the mounting holes in the headboard.

• Measure the center-to-center distance between the mounting slots of the headboard bracket flanges.

• If bracket flange adjustment is required to accept the headboard, remove the 1-inch hex head bolts and move flanges side-to-side to adjust. Reinstall bolts. Firmly tighten all headboard mounting bolts.

6 Install Headboard

• Securely install your headboard.

**IMPORTANT SAFETY NOTICE:**

The bottom of the headboard cross member must be positioned so that there are no more than 3 inches between the headboard and the top of the mattress.

**WARNING:** Do not exceed 3 inches in order to avoid a person or pet being caught in the space (referenced below) while the bed is in motion. Failure to follow this instruction could result in serious personal injury or death.

---

*Diagram showing measurement and installation instructions.*
Replacing Snap Latches on Beds with Base Silhouette

1 Raise Foot of the Bed (FlexFit™ 2 & FlexFit™ 3 models only)
   - Using your remote, fully raise the foot of your bed to allow ample working space.

   **WARNING**: Danger of entrapment. To prevent serious or fatal injuries from entrapment, do not allow a person (adult or child) or pet to play under the bed or base or with any remote controls. Failure to follow this instruction could result in serious personal injury or death.

2 Remove Silhouette Footboard
   - Remove the Silhouette footboard by pulling out from the top of the footboard down toward the floor.
   - Completely detach the footboard from the sideboards.
3 Remove Snap Latch(es)
• Using a 7/16-inch wrench, remove the two bolts to remove the snap latch on the sideboard of the Silhouette and discard. Repeat for other side as needed.

4 King Bases Only
• After removing the snap latches from the sideboards, remove the center snap latch, if necessary.
5 Attach New Snap Latch(es)

- After removing the snap latch(es) from the sideboards, place the new snap latch(es) in the same areas and loosely replace the bolts, allowing movement for alignment.
- For King size beds, replace the center snap latch, if necessary. Loosely replace the bolts, allowing movement for alignment.

6 Reconnect Footboard and Align to Silhouette

- Reconnect the Silhouette footboard and align the footboard to the Silhouette sideboards, to eliminate any gaps.

7 Tighten Bolts

- Once aligned, with Silhouette footboard attached, use the 7/16-inch wrench to tighten all bolts on snap latches firmly.
2-5-25 Warranty

Leggett & Platt, Incorporated (“L&P”) warrants this adjustable base to the consumer who is the original purchaser (the “purchaser”), subject to the terms and conditions set forth herein. This warranty begins on the “warranty commencement date” which is the date of purchase for new, unused bases and the date of manufacture for bases that have been used as floor or display models. Thus, on a floor model base, the warranty is a portion of the limited 25 year warranty.

Full 2 Year Warranty

This adjustable base is warranted against defects in workmanship or materials for a period of 2 years from the warranty commencement date. Upon notice during the first 2 years after the warranty commencement date, L&P will repair or replace (at no cost to the purchaser) any defective adjustable base part, and L&P will pay all authorized labor and shipping costs associated with the repair or replacement of any parts found to be defective.

5 Year Limited Warranty

During the third through the fifth year from the warranty commencement date, upon receipt of notice, L&P will replace any adjustable base part found to be defective. This limited 5 year warranty shall not apply unless the defective part is returned to L&P within 10 days of purchaser’s receipt of the replacement part. Purchaser shall pay all service and shipping costs related to the replacement of the defective part.

25 Year Limited Warranty

Upon notice during the sixth year through the twenty-fifth year from the warranty commencement date, L&P will replace, upon terms and conditions set forth in this paragraph, any mechanical base part found to be defective. Electronics, electrical components, drive motors and massage motors are excluded. This limited 25 year warranty shall not apply unless the defective part is returned to L&P within 10 days of purchaser’s receipt of the replacement part. In years 6-25, purchaser shall pay all service and shipping costs related to the replacement of the defective part.

Additional Terms and Conditions

This warranty does not apply (a) to any damage caused by the purchaser; (b) if there has been any repair or replacement of adjustable base parts by an unauthorized person; (c) if the adjustable base has been mishandled (whether in transit or by other means), subjected to physical or electrical abuse or misuse, or otherwise operated in any manner inconsistent with the operation and maintenance procedures outlined in this document and this warranty; (d) to damage to mattresses, fabric, cables, electrical cords or items supplied by dealers. Contact the dealer for warranty information on these items (e) if there has been any modification of the adjustable base without prior written consent by L&P; (f) to costs for unnecessary service calls, including costs for in-home service calls solely for the purpose of educating the consumer about the adjustable base or finding an unsatisfactory power connection; (g) if the recommended weight restriction is not followed (refer to Advisory section on page 28), the warranty will be void.

Repairs to or replacement of an adjustable base or its components under the terms of this limited warranty will apply to the original warranty period and will not serve to extend such period.

The decision to repair or to replace defective parts under this warranty shall be made, or cause to be made, by L&P at its option and in its sole discretion.

Repair or replacement shall be the sole remedy of the purchaser. There shall be no liability on the part of L&P for any special, indirect, incidental, or consequential damages or for any other damage, claim or loss not expressly covered by the terms of this warranty.

This limited warranty does not include reimbursement for inconvenience, removal, installation, setup time, loss of use, shipping or any other costs or expenses. Leggett & Platt or its service technicians shall not be responsible for moving furniture or any other items not attached to the adjustable base in order to perform service on the adjustable base.

It is the sole responsibility of the purchaser to provide adequate space and accessibility to the adjustable base. In the event that the technician is unable to perform service due to lack of accessibility, the service call will be billed to the purchaser and the service will have to be rescheduled.

L&P makes no other warranty whatever, express or implied, and all implied warranties of merchantability and fitness for a particular purpose are disclaimed by L&P and excluded from this agreement. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to every purchaser.

This warranty gives the purchaser specific legal rights, and the purchaser may also have other rights, which may vary from state to state. This warranty is valid in all 50 states, Puerto Rico, and Canada. For warranty or other questions please contact Select Comfort Customer Service first.

CONTACT INFORMATION: Select Comfort, Customer Service Department, 9800 59th Ave N, Minneapolis, MN 55442, 1-800-472-7185
Important Safety Instructions

NOTE: SAVE THESE INSTRUCTIONS.

The FlexFit™ control system portion of FlexFit™ adjustable base is the only Intertek ETL evaluated device described in this manual.

When using an electrical furnishing, basic precautions should always be followed. Read all instructions before using this furnishing.

DANGER – To reduce the risk of electric shock:

1. Always unplug this furnishing from the electrical outlet before cleaning.

WARNING: To reduce the risk of burns, fire, electric shock or injury to persons:

1. Unplug from outlet before putting on or taking off parts.

2. Close supervision is necessary when this furnishing is used by or near children, invalids or disabled persons.

3. Use this furnishing only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

4. Never operate this furnishing if it has a damaged cord or plug, if it is not working properly, if it has been dropped, damaged or dropped into water. Return the furnishing to a service center for examination and repair.

5. Keep the cord away from heated surfaces.

6. Never operate the furnishing with the air openings blocked. Keep the air openings free of lint, hair and the like.

7. Never drop or insert any object into any opening.

8. Do not use outdoors.

9. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.

10. To disconnect, turn all controls to the off position, then remove plug from outlet.

11. This furnishing contains receptacles that are always powered on. To Reduce the Risk of Electric Shock – Disconnect power strip from power source before servicing any equipment connected to the power strip.

12. This furnishing is intended for household use only.

WARNING: Risk of Electric Shock – Connect this furnishing to a properly grounded outlet only. See the following GROUNDING INSTRUCTIONS.

GROUNDING INSTRUCTIONS

WARNING: Electrical ground is required on this furnishing. Do not connect to an ungrounded outlet. Do not use an extension cord or two prong adapter that eliminates the connection to ground.

CAUTION: This furnishing is designed for indoor use only. Install the power strip away from heat-emitting appliances such as radiators or heat registers.

This product must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

DANGER – Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product – if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

This product is for use on a nominal 120-volt circuit and has a grounding plug that looks like the plug illustrated in Figure 1 below. Make sure that the product is connected to an outlet having the same configuration as the plug. No adapter should be used with this product.

Figure 1
Advisory

Important Information

Read the following information carefully before using this product. This adjustable base has been quality-engineered with design features to optimize your comfort and safety when operated properly.

Product Ratings

The bed lift motors are not designed for continuous use. Reliable operation and full life expectancy will be realized as long as the lift motors do not operate any more than 2 minutes within a 20 minute period, or approximately 10% duty cycle. Note: Massage equipped beds are not designed for continuous, extended massage operation.

Massage systems are rated for a maximum of 2 hours of use within any 6 hour period. Any attempt to circumvent or exceed product ratings will shorten the life expectancy of the product and may void the warranty. The recommended weight restrictions for FlexFit™ adjustable bases are as follows: DC equipped - 600 lb all sizes. The bed will structurally support the recommended weights distributed evenly across the head and foot sections. This product is not designed to support or lift this amount in the head or foot sections alone. Note: Exceeding the recommended weight restrictions could damage the adjustable bed and void the warranty. For best performance, consumers should enter and exit the adjustable bed with the base in the flat (horizontal) position.

CAUTION: DO NOT SIT ON THE HEAD OR FOOT SECTIONS WHILE IN THE RAISED POSITION.

Operating Information

• After bed assembly is complete, operate remote to ensure proper bed functions.
• Keep moving parts free of obstruction (including sheets, clothing, tubing, wiring and products using electric power cords) during bed operation.
• Distribute body weight evenly over bed surface. Do not place entire weight on raised head or foot sections of the bed, including during repositioning and entering or exiting bed.

Location Environment

The level of sound experienced during FlexFit™ bed operation is directly related to the location environment. For example, when a bed is located on a hardwood floor with the massage feature in operation, a vibrating tone will be audible. To minimize this resonance, place a piece of carpet—or optional rubber caster cups—under each leg or caster. See the Optional Accessories section on page 32 of this manual for rubber caster cup order information. It is possible to experience vibration or noise from the headboard brackets, headboards or footboards if mounting bolts are not firmly tightened.

Small Children/Pets Warning

CAUTION: Immediately dispose of packaging material as it can suffocate small children and pets. To avoid injury, children or pets should not be allowed to play under or on the bed. Children should not operate this bed without adult supervision. Keep bed in sight during operation to ensure safety and avoid injury.

FCC Compliance

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any attempt to make changes or modifications to the remote (e.g., an intentional radiator) could void the user’s authority to operate the remote according to FCC certification (section 15.231).

Hospital Use Disclaimer

CAUTION: This base is designed for in-home use only. It is not approved for hospital use and does not comply with hospital standards. Do not use this base with tent-type oxygen therapy equipment or near explosive gases.

Pacemaker Warning

CAUTION: If the massage feature is in use, this product produces a vibrating sensation. It is possible that individuals with heart assist pacemakers may experience a sensation similar to exercise. Consult physician for complete information.

Service Requirements

NOTE: Service technicians are not responsible for moving furniture, removing headboards and footboards or any items required to perform maintenance on the adjustable bed. In the event the technician is unable to perform service due to lack of accessibility, the service call will be billed to the purchaser and the service will have to be rescheduled.

Massage Operation

The massage feature will emit a minimal tone during operation; this is normal. When the massage level is increased, motor resonance will intensify accordingly.
Raising/Lowering Mechanisms

The raise/lower feature will emit a minimal humming sound during operation; this is normal. During operation, the lift arm wheels make contact with the platform support of the bed. This applies slight tension on the moving components and resonance is reduced to a minimum level. If excessive noise or vibration is experienced, reverse the movement action (up or down) of the base with the remote. This should realign the base’s activating mechanisms to the proper operational position.

Locking Caster Safety Feature

This product can be equipped with locking casters. For best results, place rubber caster cups under locking casters when the bed is located on smooth or hard surface flooring. It is still possible for locking caster equipped beds to slide even when locked and even with the use of rubber caster cups. To activate locking casters, push down on the lock tab. To disengage the locking mechanism, push up on the lock tab (see illustration below).

Lubrication

This product is maintenance free. The lift motors are permanently lubricated and sealed—no additional lubrication is required. Do not apply lubricant to lift motor lead screws or any nylon nuts or the bed may inadvertently creep downward from the elevated position.

Snore Button/Partner Snore™ Technology

CAUTION: The Snore and Partner Snore™ features are designed to facilitate the temporary adjustment to the flow of air through the nose and mouth. Ensure the comfort and safety of your sleeping partner prior to operating the Partner Snore™ feature. Discontinue use of the Partner Snore™ feature if pain, discomfort or unsafe condition results. Obstructed air flow is a common cause of mild snoring. While snoring is common in adults, it can be an indication of a more serious health condition. This is not a medical device or a substitute for medical advice, treatment or proper monitoring of any symptom or condition. Please consult your health care provider.

Cleaning Your Remote and FlexFit™ Control System

- Wipe the body with a clean cloth dampened with a mild soap and water solution.
- For the remote, wipe the display screen with a clean, dry, lint-free cloth.

CAUTION: Do not immerse in water or place in dishwasher.

When Not in Use

- Store remote, FlexFit™ control system and power cord in a controlled, indoor environment.
FlexFit™ Remote FAQ’s

Q. How do I capitalize a letter in the middle of my name?
A. Select the letter and press the Up/Down buttons simultaneously.

Q. How many characters can I use for my name?
A. Up to 11.

Q. My remote says there’s an inflation/connectivity error. What should I do?
A. An error message lets you know an issue has been detected, along with prompts for how to fix it. If the error is still not resolved, you will be instructed to visit sleepnumber.com/chat or to call us at 1-800-511-0054.

Q. How do I restore the remote’s original settings?
A. To erase all stored information, press the Home button or Menu/Select button, select System, select Settings, select Reset Preferences, select Factory Reset and follow the instructions on the remote.

Q. Why won’t my remote turn on?
A. You may need to replace or check the orientation of the batteries. Your remote comes with two AA batteries that should last about six months with normal use. If new batteries don’t resolve the issue, please visit sleepnumber.com/chat or call us at 1-800-511-0054.

Q. How do I save my Sleep Number® setting?
A. Press the Side button to choose your side of the bed. Press the Up/Down buttons to choose your Sleep Number setting, then press the My Sleep Number® Setting button on top of your remote for two seconds to save.

Q. How do I save my customized bed positions? (FlexFit™ 2 and 3 Bases Only)
A. Adjust the bed position to your preference and hold the Favorites button for 2 seconds to save the bed position. If you wish to reset the bed position back to the original position setting, press the Home button, select System, select Settings, select Reset Preferences, select Bed Positions and follow the instructions on the remote.

Q. How do I reset my timer? (FlexFit™ 2 and 3 Bases Only)
A. Press the Timer button and choose from the menu to adjust the timers that are set. Scroll to select a new time option or select Timer Off.

Q. How do I dim my under-bed nightlight? (FlexFit™ 3 Base Only)
A. Press the Home button, then select System, select Settings, select Reset Preferences, select Nightlight, then press the Up or Down button to adjust to your brightness preference.

Q. How do I turn my night stand lights on or off with the remote? (FlexFit™ 3 Base Only)
A. Press the Lights button, then select the lights you want on or off and press Enter. A light bulb icon will appear when the light selected is on and will disappear when the light is turned off.

Q. How do I change the name on my remote?
A. Press the Home button or Menu/Select button, then select System, select Settings, select Reset Preferences, select Rename Side and follow the directions on the remote to enter a new name.
Q. What if using the Snore feature does not alleviate my snoring? (FlexFit™ 2 and 3 Bases Only)
A. The Snore and Partner Snore™ features are designed to facilitate the temporary adjustment to the flow of air through the nose and mouth. Obstructed air flow is a common cause of mild snoring. While snoring is common in adults, it can be an indication of a more serious health condition. This is not a medical device or a substitute for medical advice, treatment or proper monitoring of any symptom or condition. Please consult your health care provider.

Q. What do I do if I press the button to turn on my night stand lamps, but nothing happens? (FlexFit™ 3 Base Only)
A. Many lamps also have an on/off switch. Ensure the lamp switch is turned on. Ensure the lamp is connected to the FlexFit™ control system. Also check to see if the light bulb needs to be replaced. If the issue persists, visit sleepnumber.com/chat or call us at 1-800-511-0054.

Q. My remote says there’s a bed position connectivity error. What should I do?
A. Verify that the power cord is securely plugged into the FlexFit™ control system and into a working outlet. Verify that the FlexFit™ control system reset button is switched to Reset. If the error persists, visit sleepnumber.com/chat or call us at 1-800-511-0054.

Q. I lost my remote. What should I do?
A. Contact Customer Service to purchase a replacement remote. You can manually return your base to flat using the Flat Base button located on the back of the FlexFit™ control system (see page 12).

Q. What if the head or foot section of my bed will lift, but will not return to flat?
A. Check for obstructions (pillows, blankets, etc.) that prevent the deck from lowering. Also verify that the head of the bed is at least 2 inches away from the wall or headboard to provide the required clearance to raise the head. If the issue persists, visit sleepnumber.com/chat or call us at 1-800-511-0054.
Optional Accessories

The FlexFit™ series is designed to fit standard bedroom furniture. If your furniture does not accommodate your FlexFit™ model please contact Customer Service at 1-800-472-7185 for potential solutions. Call 1-800-580-7216 for accessory pricing and to order the accessories listed.

Caster Cups (4)
Recommended for use of the FlexFit™ series on hardwood floors or other hard surfaces. Install under caster wheels to prevent the bed from moving. Four cups per set.
CODE 116449

Glides (4)
Our lowest bed-height option. Thread directly into the FlexFit™ base. Four glides per set. See diagram on opposite page for bed height dimensions. Note: headboard brackets cannot be used with glides.
CODE 107397

Snap-in Casters (4)
Snap directly into 4", 6.5", 7" and 9" legs for added height and base mobility.
CODE 120743

Threaded Casters (4)
Our second-lowest bed-height option. Threaded casters thread directly into the FlexFit™ base. Four threaded casters per set. See diagram on opposite page for bed height dimensions. Note: headboard brackets cannot be used with threaded casters.
CODE 119560

Legs (4)
For increased bed height and under-bed storage. Select from four leg height options. Four legs per set. See diagram on opposite page for bed height dimensions.
4" Legs CODE 120744
7" Legs CODE 107399
9" Legs CODE 116447
11" Legs CODE 116448

Swing Away Hinge Kit (1)
For easy under-bed cleaning and bed-making access. Split King beds easily split apart with the swing away hinges that attach between the headboard and each side of the split king bed. Two hinges included.
CODE 107396

Mattress Retainer Bar Kit (1)
For use with non-SLEEP NUMBER® beds. Sleep Number beds use our patented mattress-retaining kit to attach the mattress to the adjustable base. The mattress retainer bar is required when other mattresses are used with the adjustable base to prevent the mattress from sliding when raising the head of the bed.
CODE 117450

Headboard Bracket Kit (1)
Attach an existing headboard to your FlexFit™ base. Note: headboard brackets cannot be used with glides. Find your size and code in the chart at right.
