

# sleep number®

## Bedding Collection

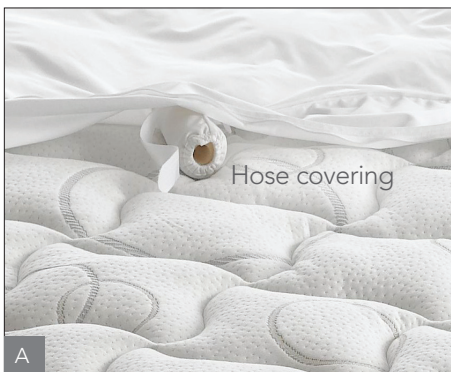

### Total Encasement Mattress Cover

#### Features and Benefits:

- Designed exclusively for the SLEEP NUMBER® bed to provide superior protection against bed bugs
- Soft knit fabric cover features a silky-smooth polyester surface on top
- Scientifically-tested polyurethane surface closest to the mattress blocks out bed bugs, dust mites and allergens
- Fully-zippered encasement provides an effective barrier with an outer zipper flap, an interior zipper flap and reinforced inner seams

### Total Encasement Mattress Cover Instructions

**Fully read through instructions before you start:** Remove all bedding from your bed. Pull the bed away from the wall, if necessary, to access the hose(s) at the head of the mattress.

1. Remove the Total Encasement Mattress Cover from the packaging and unzip fully. Position the cover at the foot of the bed. Identify the bottom as the side with the hose covering(s) (Figure A).

2. Lifting the mattress slightly, slide the bottom of the Total Encasement Mattress Cover slowly under the mattress (2 people if possible). Avoid pulling unnecessarily on seams (Figure B).

3. Slide the Total Encasement Mattress Cover all the way to the head of the mattress. Position the bottom of the Total Encasement Cover in place under the mattress, so that hose coverings are at head of the bed (Figure C).

## Total Encasement Mattress Cover Instructions

4. Unzip the bed Pillowtop completely (Figure D). Fold back the Pillowtop and Foam Comfort Pad halfway.

5. Remove the Foam Border Wall at the head of the bed (Figure E).

6. This will give you access to the hose(s) connected to the inner chambers (Figure F). Unplug the hose(s) and pull out of the bed cover.

7. Pass the hose(s) through the Total Encasement Mattress Cover hose coverings from the outside (Figure G).

8. Reconnect the hose(s) to the air chambers. You must hear a click, otherwise they are not connected properly (Figure H).

9. Replace foam and zip bed closed. Then zip the Total Encasement Mattress Cover closed. Secure hose covering(s) by pulling on the Velcro strap until the hose is squeezed tight. Hold in place and wrap strap around to close the fastener. **THIS IS IMPORTANT** in order to ensure complete anti-allergen protection (Figure I).

**When You Finish:** Reset your SLEEP NUMBER® setting and remake your bed. Use a mattress pad or layer over the Total Encasement Mattress Cover, if desired.
